

Please do not allow changes to the Indiana Telephone Privacy Law. It has been a godsend. I can now sit down and eat dinner with my family without getting up several times several nights a week to answer the telephone. Just because we have accounts with banks, credit card companies, etc. It should not give them open access to call at will. They send at will tons of mail a year and I am sure that calling us is cheaper, but it is disturbing and should not be allowed. Indiana had taken steps to help its residents and this should not be changed.
